

REGENCY MANOR CARE HOME, HUNSTANTON

KEY FACTS

CLIENT

Wynbrook Ltd

YEAR COMPLETED

2025

SECTOR

Residential Healthcare

VALUE

£6M

PROJECT DESCRIPTION

Regency Manor is a quality new care home, providing expert dementia and residential care to its occupants.

HWA has provided structural and civil engineering consultancy services as part of the project team, bringing this exceptional scheme to life.

During the site development, our engineers had to consider the existing overland surface water flow and divert it around the proposed building.

In addition, the care home and assisted living flats were treated as separate developments, adding to the complexity of the project.

The completed development also includes a hair salon, cinema, café and outdoor terraces, all set within beautiful landscaped gardens for the residents to enjoy.

Regency Manor will add to the vibrant, small community in Hunstanton.
